First aid

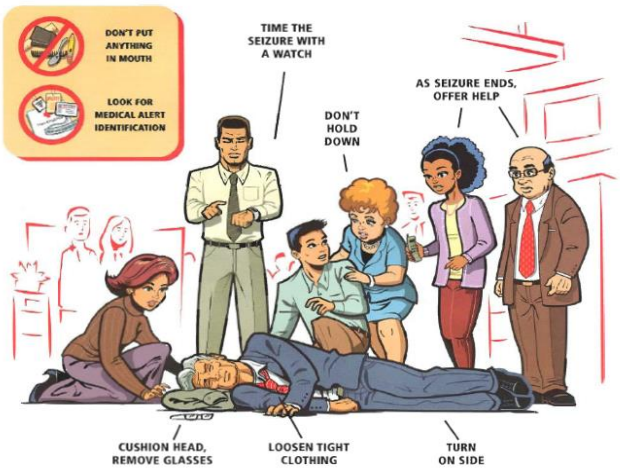
First aid is immediate and temporary treatment of a victim of sudden illness or injury while awaiting the arrival of medical aid.

DEFINITION

First aid is the care given to a casualty before professional help arrives.

It can come from the first responder to be on the spot.



Goals

- *Saving life*
- Ensuring a better and more rapid recovery.
- Avoidance of unnecessary movement and over-excitation of the victim.

GOAL

1. To restore and maintain vital functions.
2. To prevent further injury or deterioration
3. To reassure the victim and make him or her as comfortable as possible

Basics to FIRST AID

1. Stay Calm.
2. Prioritize injuries.
3. Call 123 .

Basics to FIRST AID

1. Stay Calm.
2. Prioritize injuries.
3. Call 123 .
4. Crowd control.
5. Move victim when injuries have been evaluated and it is safe to do so.
6. Assume you are in charge until another more qualified person takes over.

CARE ORDER

- Assess victim for signs of life.
- Restore respiration if breathing has stopped.
- Restore heart action if there is no heartbeat or pulse.
- Stop bleeding if present.
- Treat shock.

PRIMARY SURVEY
