

1 _ pancreas

A: islets of Langerhans

2 _ liver of pig 🐷

A: central vein

3 _ ciliary body (process)

4 _ inactive mammary gland

5 _ iris

A: pigment stratified squamous epith

6 _ penis of bull

A: urethra

B: bundles of collagen

7 _ kidney

A: glomerulus

B: renal corpuscle

8 _ parathyroid gland

A: oxyphil cells

B: chief cells

9 _ thymus of avian

A: Hassall's corpuscle

10 _ parotid salivary gland

A: intra lobular duct

11 _ ovary of fish

12 _ ureter

13 _ gall bladder

14 _ tongue

A: filiform papillae

B: tunica muscularis (skeletal muscle)

15 _ rumen

A: ruminal papillae

16 _ hepatopancreas in fish

A: pancreas of hepatopancreas

17 _ testis

18 _ cardiac gland region

19 _ pyloric gland region

20 _ prostate gland

1_gall bladder

(A): tunica muscularis

2 _ pancreas

3 _ testis

A: convoluted seminiferous tubule

4 _ cornea

A: stratified squamous epithelium

5 _ uterus of dog

A: myometrium

B: perimetrium

6 _ penis of dog

A: cavernous space

B: urethra

7 _ pituitary gland

A: pars intermedia

B: pars distalis

8 _ hard palate

A: keratin layer

9 _ mandibular salivary gland

A: mucous acini

10 _ epididymitis

A: epididymal ductule

11 _ external ear

A: dermis

12 Reticulum

A: Reticulum fold

13 _ parathyroid gland

14 _ uterus of sheep

A: endometrium gland

15 _ transitional epithelium

16 _ parotid salivary gland

17 _ ductus deferens

A: pseudo stratified columnar epithelium

18 _ ovary of mammals

A: corpus luteum

B: medulla

19 _ ileum (Peyer's patches)

A: tunica muscularis

20 _ esophagus

A: lamina propria

12 Iris ① → Pigment epith

② → loose CT

13 Gizzard ① → Kolin / T. Cuticula

② → T. mucosa

14 Testis ① → Germine Cells

15 Adrenal gland

16 Tongue ① → Filiform papillae

② → T. muscularis (skeletal m.)

17 Circumvallate papillae

① → taste buds

② → Lo. epith (ker. str. sq. epith.)

18 Active mammary gland

① → Alveoli

② → Co. T.

19 Penis of bull

① → Uthra

② → Cavernous spaces

shlako

11 Avian thymus

1 → Hassel's corpuscles

2 ovary of ~~mammals~~ mammals ① → Corpus luteum
② → medulla

3 liver of mammals ① → portal triad

4 large intestine ① → intestinal gland
② → goblet cell

5 Rumen ① → Rumenal papillae

6 Hepatopancreas ① → Hepatopancreatic acini of hepatopancreas
② → blood of fish

7 esophagus ① → ~~ker~~ L. epith (str. sq. epi. non ker)
② → L. propria (dense irregular C.T.)

8 Uterus of sheep ① → endometrium
② → endometrium gland

9 pituitary gland ① → pituitary cleft
② → pars nervosa

10 gall bladder ① → T. muscularis
② → T. serosa

11 Lip ① → orbicularis m.
② → hair follicle

Answers

- 1- Kidney/
Renal corpuscle
- 2- Omasum
- 3- Cardiac gland
- 4- Mandibular S.g
- 5- pancreas/ Islet
- 6- Parathyroid gland/
Oxyphils cells
- 7- Uterus of sheep
- 8- Teat canal / smooth M.
- 9- Testis/
spermatogenic cell
- 10- Ducts difference
- 11- prostate gland/
Fibromuscular stroma
- 12- Skin/ (A sweat gland -
hair follicle)
- 13- Iris / loos c.T
- 14- proventriculus
- 15- Gizzard/ Koilin
- 16- Thymus of avian/ Hassall's
corpuscles
- 17- Hepato pancreas/
pancreatic aciniues
- 18- Esophagus
- 19- Gills/ Primary gill
filaments
- 20- Ciliary process/ Cilia
muscles (smooth)
