

Basics to FIRST AID

Definitions:

First aid is the care given to a casualty before professional help arrives.

It can come from the first responder to be on the spot.

Goals:

- **To restore and maintain vital functions.**
- **To prevent further injury or deterioration**
- **To reassure the victim and make him or her as comfortable as possible**

Before performing any First Aid Check for:

- **Electrical hazards**
- **Chemical hazards**
- **Toxic gases**
- **Ground hazards**
- **Fire**

Basic Behaviors in First Aid

1-Stay Calm.

2-Prioritize injuries.

3-Call 123.

4-Crowd control.

5-Move victim when injuries have been evaluated and it is safe to do so.

6-Assume you are in charge until another more qualified person takes over.

CARE ORDER

- Assess victim for signs of life.
- Restore respiration if breathing has stopped.
- Restore heart action if there is no heartbeat or pulse.
